

LIGHT RAIL IS COMING TO

SANDRINGHAM/BALMORAL

How will light rail change our neighbourhood?

Light rail is much more than a transport project. People and businesses will want to be close to stops or stations, so these areas will grow into thriving hubs. This will attract tens of thousands of new homes and jobs in established areas instead of the city fringes.

Great homes have great transport

When we're easily connected to the places we want to go, our quality of life improves. Light rail will give you fast and frequent travel around the city. Less dependency on cars to get around is also better for families, neighbourhoods and the environment.

Streets for people

Rail in a tunnel and less buses and vehicles will free up space for other uses, including walking and cycling connections to each station or stop.

Trains every five minutes (or less) to:

Stay in the loop
