

Bringing us closer

Light rail is much more than a transport project. It's a step towards a better future for Auckland, a foundation for future growth and development that will enable our communities, economy and environment to thrive.

Introducing Auckland Light Rail

The Ministry of Transport, Waka Kotahi NZ Transport Agency, Auckland Council, Auckland Transport, Kāinga Ora and Mana Whenua are working side by side on the project to look at how light rail can work best for the city.

The project team is developing an indicative business case and making recommendations. This will help to enable the Government to make a decision at the end of the year about the route, mode and delivery entity for the project.

Artist's impressions only to show how modern trams or light metro could look. Road widths differ and in some locations more space will be needed. This will depend on the design in the future.

Our priority is to deliver light rail between the city centre and Māngere.

Campaign launch

A media campaign and website was launched today to introduce the project and encourage people to share their views about light rail. Our campaign is supported by engagement events in the five corridor communities: City Centre, Eden Valley/Sandringham, Mt Roskill, Onehunga and Māngere/Airport.

Get involved

Visit our [website](#) to find out more about the project. You can complete an online feedback form, subscribe to project updates and news and find out about upcoming events.
